

**VIBRANT**

Custom Colors. Global Standards. Vibrant Vision

Color Solutions that Shape Tomorrow

**Customized Solutions:** Masterbatches tailored to meet your specific needs.  
**Experienced Technical Team:** Focused on innovation and product development.  
**Strong Customer Support:** Ensuring timely deliveries and proactive services.

## About Us

VIBRANT Colortech Pvt. Ltd. is a leading India-based manufacturer of high-quality masterbatches, trusted by clients across both domestic and international markets. With over 30 years of industry experience, we have developed more than 7,500 + unique color shades and built strong partnerships in over 17 + countries.

Innovation is at the heart of everything we do. From customized solutions to advanced polymer technologies, our focus remains on delivering consistent quality, performance, and reliability. Our expertise extends to additive and engineering polymer-based masterbatches, as well as pioneering work in compostable and eco-friendly materials for next-generation applications.

Driven by excellence and backed by a dedicated technical team, VIBRANT Colortech continues to shape the future of color solutions with integrity, precision, and sustainability.

**“Our motto is to deliver Innovative Solutions that adhere to the highest standards of the market in terms of Performance and Reliability.”**

# Product Range

## SPECIALITY ADDITIVES

- Nucleating agents/Clarifiers
- PET IV Enhancer
- Anti Scratch
- Anti Fog
- Anti-Microbial/Anti-Fungal
- Polymer processing Aid (PPA)
- Anti-Static Agent
- UV Stabilizer's
- Slip/Anti slip Agents
- Bio-Degradable Additives
- Optical Brightener
- Anti-Block
- Performance Enhancer for Recycling

## MASTERBATCHES

- Black MB
- White MB
- All Color Masterbatches
- Transparent/Translucent MB
- Marble/Granite MB
- Pearlescent Masterbatch
- Glow in The Dark masterbatches
- Engineering Plastic Masterbatches - PC, ABS, NYLON, POM, EVA, KETONE & many more. .
- Bio-Degradable Masterbatches

## COMPOUNDS

- FR Compound
- PC/ABS Blends
- Glass Filled Compounds
- Talc/Calcium filled compounds
- ESD compounds

Innovative Solutions that adhere to the highest standards of the market in terms of Performance and Reliability.

## Introducing Fresh Hues

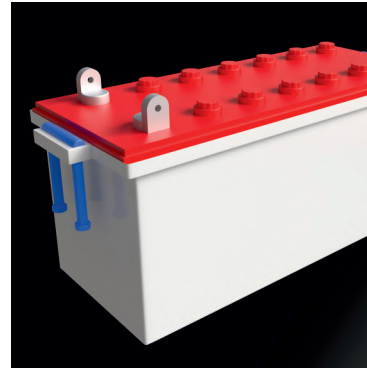

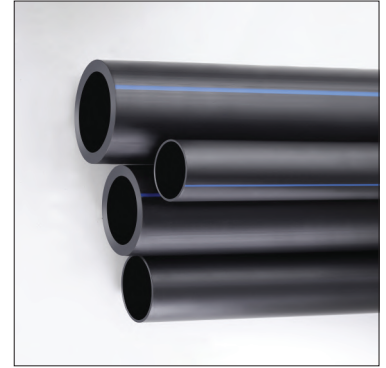

- Speckled Masterbatches
- Natural fibre Masterbatches

# Manufacturing Excellence Across Industries

“With constant Technological Advancement and change in market trends. We at **VIBRANT** constantly strive to reinvent our technological capabilities and to ensure that our Masterbatches not only give an Aesthetic appeal but also add a Functional value to it.”

**Black Masterbatches**  
 Special black for electronic applications  
 Deepest possible black finish  
 UV-enhanced for better light resistance  
 Piano black & multiple tints available

**White Masterbatches**  
 Up to 75% maximum loading  
 Brightener added  
 Product-specific customization  
 UV enhanced

**Color Masterbatches**  
 Custom colors for desired product finish  
 Expertise in color matching  
 Trusted source with wide pigment range

**Special Effect Masterbatches**  
 Pearl Finish, Metallic Finish,  
 Marble Effect, Fluorescent  
 Wood Finish, Glitter Based  
 Glow in Dark, Transparent

# VIBRANT

**VIBRANT** Colortech meets several important industry certifications and adheres to rigorous testing standards to ensure product quality and safety:

**Stringent Quality Control:** Vibrant operates with a strict **'No Compromise'** approach to quality, implementing rigorous quality control at raw material sourcing and throughout production to maintain consistent shade, tone, and properties. They rely exclusively on imported manufacturing lines for process efficiency and product uniformity.

# VIBRANT

VIBRANT offers several unique technical capabilities that distinguish it from competitors in the masterbatch industry:

**Metameric Interference-Based Color Matching System:** VIBRANT has innovated a unique color matching system that ensures uniform color shades are achieved consistently under different lighting conditions. This technology is not commonly found in the trade and provides clients with highly reliable and reproducible color matching results.

## Advanced Engineering Plastic Masterbatches:

VIBRANT specializes in masterbatches for engineering plastics like polycarbonate (PC), polyamide (PA), ABS, PBT, etc., which enhance mechanical strength, thermal stability (up to 300°C), UV resistance, chemical resistance, and color consistency. These masterbatches are customizable for flame retardancy, anti-static properties, impact modifiers, and more, suitable for critical, high-performance applications.

## Comprehensive Functional Additives Portfolio:

VIBRANT offers a broad range of polymer additives integrated into masterbatches, including optical brighteners, anti-scratch, antimicrobial, anti-termite, strength enhancers, VCI, anti-block, antioxidants, UV stabilizers, nucleating agents, and more. These enhance product functionality beyond just Aesthetics.

## Futuristic Special Effects and In-House Technology

New advances include speckled and effect masterbatches (sparkle, pearl, granite) enabled by proprietary in-house processes.

The tech enables customers to turn unique ideas into reality and enhances future-readiness by supporting creative and functional goals
